

# Hydration Station Marshall County Family Resource Network

## Main Goal

Increase the access to drinking water at Moundsville Park

## Research Findings

# 4500

Community members reached and impacted

# 22.3%

Population is of the elderly community >65

# 22.4%

Population is experiencing homelessness

There was no adequate source of drinking water in the park. This can cause a threat to health, but can also bring more people into the park.

## Environmental Changes

Created physical and observable change to the built and social environment at East End Park.

ActiveWV 2030 Physical Activity Plan Sector:

Community Recreation, Fitness and Parks

## Health Equity

Strong health equity impact

In close proximity to those in low income housing and those experiencing homelessness

The water station is completely accessible by foot and is easy to use for all demographics and ages

## The Bottom Line

With this project Marshall County was able to create partnerships and lasting collaborations for future enhancements and additions to the park. The hydration station is successfully running and has received amazing feedback.
