

Main Goal

Fix up bikes to be able to donate to those in needs

Research Findings

300

People reached and impacted by improved bike access

4 Kidz

Mainly, but also for some adults

27%

Bicycle recycle rate

Areas of low income may not be able to afford transportation, bikes for their children, or repairs on bikes. This program allows all children to have a chance of learning to ride a bicycle, encourages physical activity, and allows a form of transportation for some adults. It not only improves physical well being but also social well being in children and adults.

System Changes

Created a program to create sustainable change in activity

ActiveWV 2030 Physical Activity Plan Sector:

Sport

Building Capacity

Stronger Communities

Provide bikes for those who need to commute and also working on a presence in the community to teach people how to repair bikes.

Provide bikes for children in low income housing, trans students, and promote minorities on bikes.

The Bottom Line

The project is very successful and has served over 300 children. They have been able to build many local relationships with other non profit organizations and work together. They continue to receive donations from many organizations and hundreds of bikes from an organization called Strider and work with the organization Nerd ER depot to recycle bike parts that are unable to be used.
