

Bicycle Repair Station

Kanawha Valley Trail Alliance

Main Goal

Install bicycle repair stations in high use areas for biking and recreation in Kanawha Valley

Research Findings

250000

Community members impacted by improved access

2

Duro Fix-It stands with air kits implemented

9.1

Miles of trail

The bicycle repair stations are a major benefit to the cycling community. They provide cyclists with many of the tools needed for simple repairs and will keep them on the road (or trail) while enjoying the beautiful routes throughout the area.

Environmental Changes

The repair stations enhanced overall appeal and usability of areas that offer routes for cyclists in Kanawha State Forest

ActiveWV 2030 Physical Activity Plan Sector:

Community Recreation, Fitness and Parks

Building Capacity

Stronger Communities

The bicycle repair stations are free to use, and are all in economically diverse communities.

This allows for **all** community members to enjoy equal access.

The Bottom Line

The project has been a huge success and many enhancements to the trail to allow for more access to physical activity. Kanawha Valley Trail Alliance plans to continue adding repair stands to the trail and working with the Center of ActiveWV. See more at www.kvtrails.com
