### Building Capacity

Stronger Communities

With the new, wide range of high-quality PE equipment, Timberwood has provided students with the access to materials that allow them to actively participate in multiple sports and activities.

### Environmental Changes

Has created physical and observable change by adding new equipment to go along with the new school and new gymnasium.

## Impacts of New Equipment

With the help of this grant, Timberwood Elementary has "allowed our students to engage in structured physical activity in ways that promote teamwork, skill development, sportsmanship, and overall health. Having immediate access to diverse equipment has expanded opportunities for participation, increased student engagement, and supported the development of lifelong healthy habits." The equipment, combined with the new gym, has given the students an opportunity to play hockey, soccer, whiffle ball, basketball, football, Gaga ball, gymnastics, and much more. This is an investment in students' physical well-being that will continue to support healthy and active learning environments.
